

ARTELIA

Spring 2026 Catalogue

Curated selections from emerging voices in digital, material and narrative practice.

This edition brings together artists working across installation, print, sound, object-based research and the future of the post-digital image.

Featured artists: Helena Voss, Rafa Neri, Maria Sol, Orin Wren, Lucia M.

Editorial note

This catalogue presents a collection of works and ongoing projects exploring memory, materiality and the ethics of attention. The selection reflects a curatorial line rooted in slowness, tactility, and narrative experimentation - works that carry both archival depth and a strong sense of the present.
